

Manual

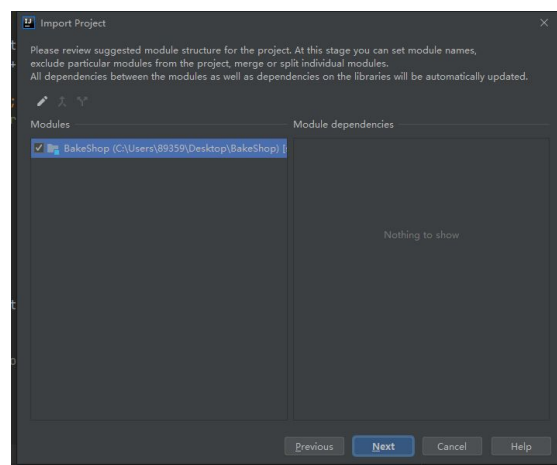

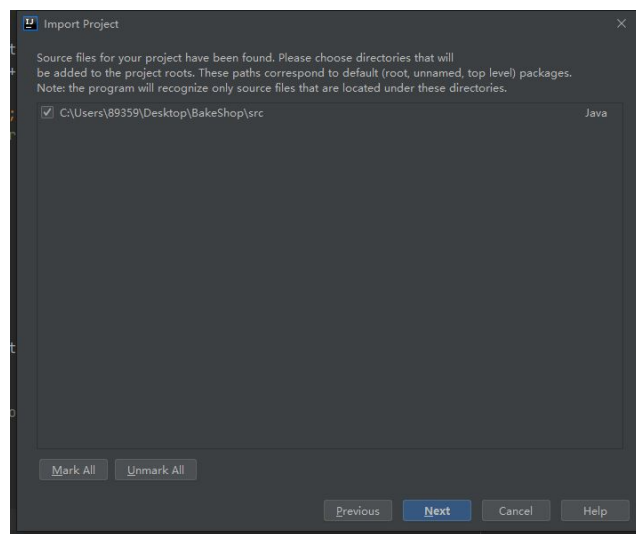

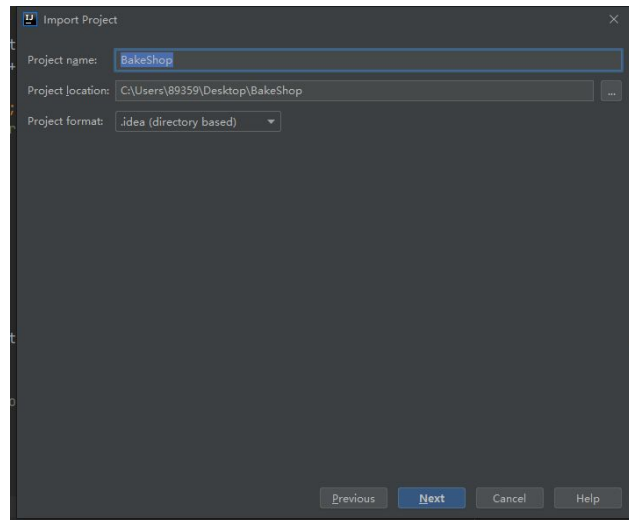

Installation Guidelines :

Unzip the file in the compressed package.

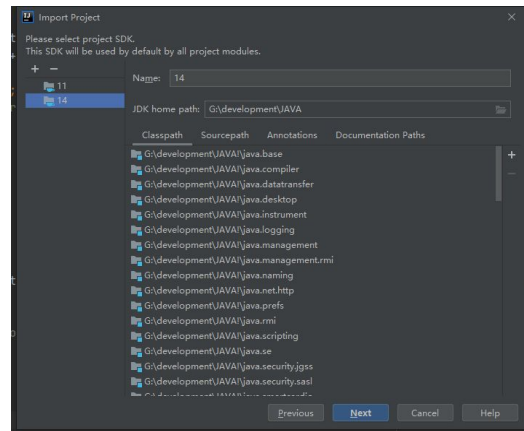

And open it with any IDE

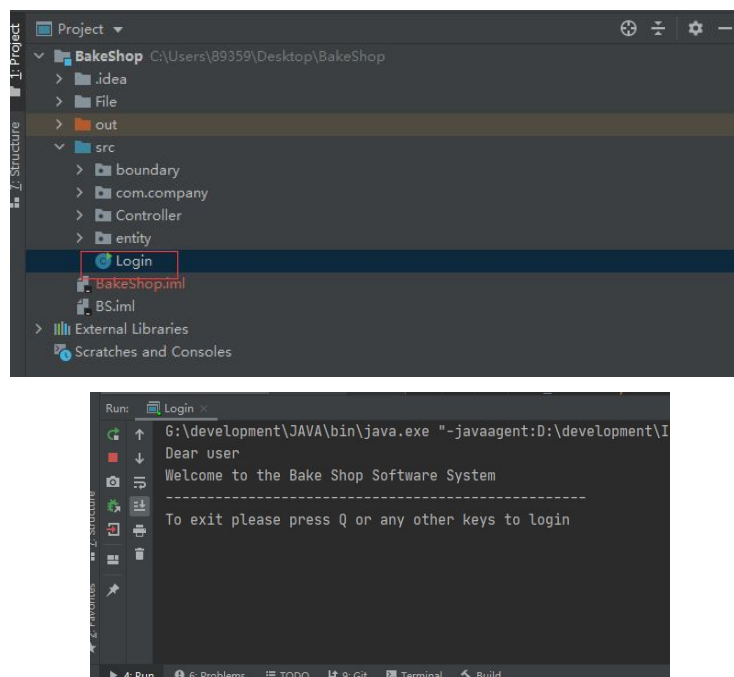

Installing the SDK

Now you can run it on the Login page.

Troubleshooting :

Please enter characters or numbers as required as possible. If you enter illegal characters, please follow the prompts to change. The system has done input verification in most cases and will not report an error, but if an error is reported, please re-run the program and input as required next time. If you encounter any unresolved system bugs or have any feedback, you can contact us, the following is our email:
